BY ANTHROPIC

I

somewhere in one of converstain .. we picked webflow templates\

I'll help you work with InTime eSolutions. Let me check the current status from the Master Operations Manual.

Based on the documentation, I can see that InTime eSolutions is in its early operational phase with:

## **Current Status:**

- Monthly Recurring Revenue: \$7,000
- Available Capital: \$15,000/month
- 27-person bench ready (15 Guidewire, 3 AI/ML, 9 others)
- Need to hire 5 core team members immediately
- VMS broker partnership providing access to 7 states

## **Today's Top 3 Priorities:**

1. **Hire the 5-person core team** - This is critical for scaling operations. You need:
  - Operations Director (\$4,000/month)
  - Staffing Manager (\$3,500/month)
  - Academy Manager (\$2,500/month)
  - Business Development Manager (\$2,000 base + commission)
  - Administrative Coordinator (\$1,500/month)
2. **Activate VMS submissions** - With 27 bench candidates ready and 7 state VMS access through your broker, you should be targeting 10 submissions daily to hit the 5 placements needed for Month 1's \$55K revenue target.
3. **Launch training enrollment campaign** - The Academy needs 15 enrollments at \$1,500 each to contribute \$22,500 toward Month 1 goals. This is your fastest path to cash since it's paid upfront.

Regarding Webflow templates - I see you mentioned selecting them in a previous conversation. This would be for building the InTime Academy website and landing pages for the three business units. Would you like me to help with implementing the Webflow templates or focus on one of the operational priorities above?

What specific area would you like to tackle first today?
